

Remote-Hiring Companies

Remote-Hiring Companies — Full 97-Company Set

Consolidated from the full job-search inventory (`ai-sector-job-openings.csv` , 228 roles / 97 companies). Each company classified by whether it hires **remote full-time employees**, using per-role work-model data, with the 40 long-tail companies additionally **hand-verified against their actual remote policies** (which corrected several false positives — e.g. AfterQuery's "remote" is a contractor network, not FTE). Run 2026-07-02. Full data + the No/Maybe tiers: `remote-hiring-companies.csv` .

Confidence:  live-verified = current posting/careers page checked directly (2026-07-02);  verified = policy text read directly (long-tail set);  role-data = inferred from a posted role's work-model (broader/known set) — verify the req.

Update (2026-07-02): the 8 previously-ambiguous companies were live-verified and resolved — **Augment, Ema, Tessera Labs, Pallet** → **Yes**; **FERMÀT, Prosper AI, Profound, Paradigm** → **No**. The "Maybe (verify)" tier is now empty.

Tally across 97: **38 hire remote FTEs** · 0 maybe · 19 hybrid-lean · 38 onsite/hybrid-only · 2 unknown.

✓ Hire remote full-time employees (38)

Company	Remote role(s) — example	# rem	Size	Source	Set

Writer	AI Deployment Engineer (East)	1	—	■ role-data	broader/known
Zapier	Lead Product Manager, AI Capabilities	3	—	■ role-data	broader/known

Notes: **Caylent (~897)** and **EvenUp (~835)** are remote but exceed the 500 ceiling from your reading-list filter — kept here since this list is the full 97, flagged ⚠. **Decagon** is mostly SF-onsite (9 of 10 roles) but has one remote role (Strategic Solutions Engineer, West), so it qualifies. The ✓-verified long-tail entries with "# rem = 0" (Forerunner, Forge, Auctor, Lorikeet, Onebrief, Runlayer, Siena, Dealops, HappyRobot) had their target role tagged "unknown" in the raw data but confirmed **remote** in the company's stated policy — that's the value of the hand-check.

🟢 Previously ambiguous — now live-verified (resolved 2026-07-02)

- **Augment** → **Yes** — the target *Product Manager* posting is explicitly **Remote** (\$174–220k); Voice PM and Sr AE also remote. Best of the eight.
- **Ema** → **Yes** — *Solutions Architect / Forward-Deployed SA (North America)* is **Remote (US)** and is itself a fit-relevant forward-deployed role; the PM role is hybrid (SF 3 days/wk).
- **Tessera Labs** → **Yes** — *Forward-Deployed Engineer (Pre-Sales)* is **US-Remote**; the target PM is hybrid (San Jose HQ / NYC / SF).
- **Pallet** → **Yes*** — hires remote FTE for **select roles only** (e.g. *Enterprise Sales Engineer, Remote*); the fit-relevant *Deployment Strategist* is **onsite** NYC/SF 5 days/wk. Remote, but not for your target family.
- **FERMÀT** → **No** — FDPM is SF onsite; SF/NYC/Bangalore office-hub, no remote FTE role found.
- **Prosper AI** → **No** — AI PM is onsite in NY or Barcelona.
- **Profound** → **No** — all PM roles on-site NYC (Union Square).
- **Paradigm** → **No** — 5 days/week in-person in SF; all roles onsite.

🟡 Hybrid-lean — remote possible but roles skew hybrid (19)

Anthropic · BCG X · Clay · Cohere · Deloitte · Deloitte (USI) · Distyl AI · Fireworks AI · Forethought · Freeplay · Labelbox · LangChain · McKinsey QuantumBlack · Notion · OpenAI · Ramp · Snorkel AI · Synthesia · Vanta (*These large/known employers run hybrid cultures; remote FTE roles exist episodically — check their boards directly.*)

🔴 Onsite / hybrid-only for the roles found (38)

Abridge · AfterQuery · Amigo · Axion · Bespoke Labs · cBEYONData/SMX · Context · Datacurve · David AI · EliseAI · Factory.ai · **FERMÀT** · Fractional AI · Google DeepMind · Halluminate · Handshake AI · Harvey · Hebbia · LMArena (Arena) · Lyzr · Mechanize · Mercor · Mistral AI · Northslope Technologies · Palantir · **Paradigm** · Patronus AI · Percepta · Peregrine Technologies · Perplexity · Prime Intellect · **Profound** · **Prosper AI** · Retool · Scale AI · Sierra · Vals AI · xAI (*Bold = live-verified onsite in this pass. Mostly the SF/NY-onsite agent labs and data companies; the long-tail members — AfterQuery, Amigo, Axion, Context, David AI, Factory.ai, FERMÀT, Fractional AI, Northslope, Paradigm, Percepta, Peregrine, Profound, Prosper AI — were hand- or live-verified onsite for their open roles.*)

How to use this

- **The CSV (`remote-hiring-companies.csv`)** has all 97 with columns: company, remoteStatus, confidence, headcount, over500, remoteRoleCount, remoteRoleTitles, workModelMix (rem/hyb/ons/unk counts), vertical, exampleUrl, and the verified policy note. Filter `remoteStatus = Yes` for the shortlist, or sort by `remoteRoleCount` to find the most remote-heavy employers (Surge 5, EvenUp 6, Cresta 4, Tribe 4, Zapier 3, Turing 3, Sema4 3).
- **Best remote fits for your profile** (intersecting this list with the fit-ranking): Forerunner, Auctor, Forge/Poetic, Lorikeet, Tailor, Tribe AI, Siena AI, Sema4.ai, Onebrief — all -verified remote and high-fit.
- **Caveats:**  role-data classifications reflect the specific roles captured in the July 2026 sweep, not every open role; a company marked onsite may post a remote role later. Re-check the live board before deciding.
